Bank of Buffalo

Remote Deposit Capture

Remote Deposit Capture (RDC) allows businesses to deposit checks electronically without visiting a bank branch. Businesses use a dedicated check scanner connected to a computer to securely scan and submit checks through Online Banking, saving time and improving efficiency.

How it Works

1. Receive and endorse a paper check.
2. Scan the check using the provided RDC scanner.
3. Submit the check images through the RDC software.
4. The bank reviews and verifies the deposit.
5. Funds are processed and credited according to the Bank's Funds Availability Policy.

Additional Features

- Deposit checks electronically from your office.
- Secure image transmission helps protect sensitive financial information.
- Submit multiple checks in a single deposit.
- Easy-to-use software simplifies the deposit process for businesses of all sizes.

Benefits

6. Deposit checks from the convenience of your office.
7. Save time by reducing trips to the bank.
8. Improve cash flow with faster deposit processing.
9. Increase security by reducing the need to transport or mail paper checks.
10. Convenient and efficient for businesses that regularly receive check payments.
